

CINE-DINE

OMNITERM Cine-Dine application offers your entertainment venue an additional convenience to theatre owners who have a venue with a restaurant along with their movie theatre.

OMNITERM Cine-Dine is suitable for both small and large theatres who want to eliminate the management of two separate software systems.

Key Features:

- Bar and/or Kitchen Printing
- Detailed Shift Management
- Open Tabs
- Food Modifiers / Cooking Instructions
- Consolidated Inventory
- Supports Ticketing Purchases
- Real-Time Access to All Operational Functions

The **Cine-Dine** software application was designed to address the needs of modern leisure and entertainment venues, which increasingly combine multiple activities within a single venue.

Integra enables your venue to have one software package that can provide real-time transactional data and central control over your restaurant operations which help streamlines the management of your venue complex.

This main POS application includes vendor interface, inventory management, gift card processing, credit card processing, promotion and discount management, menu and recipe costing and a HR punch clock.

Our innovative TMS package, gives you as much control as you want with all the reporting you need. With inventory control, full reporting and an easy to use interface, Integra will save you time and money and frustration.
